

## BANANA

<b>Crop</b>	Banana Prata
<b>Location</b>	Brazil
<b>Problem</b>	Soil salinization, clogging
<b>Date</b>	October 2016
<b>Duration of study</b>	10 months

Aqua4D® enables the salts to remain dissolved in the water, and those not absorbed by the plants trickle down well under the rhizosphere in a dissolved form.

A study was carried out by comparing the output obtained on two plots with identical conditions, one irrigated with untreated water and the other irrigated with water treated with Aqua4D®.

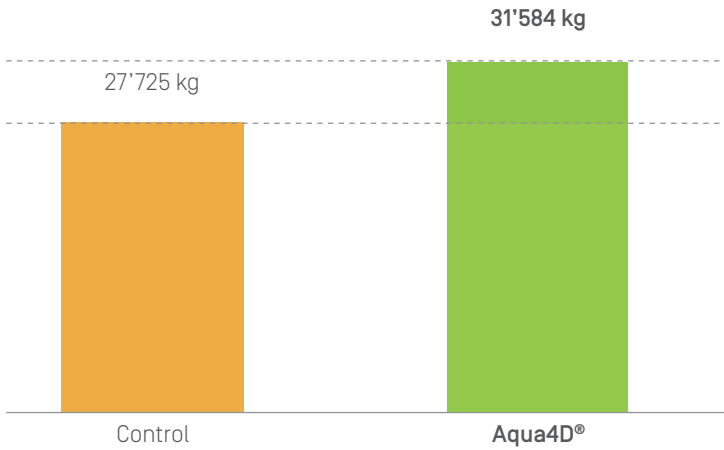

There is no more crystallization of salts in the soil micropores to damage the plant.
